SUMMARY

Dedicated Computer Science graduate with a keen interest in software development and digital transformation. Proficient in frontend development, blockchain, and Linux environments. Currently pursuing a PG Diploma in Applied AI, aiming to contribute innovative solutions in a technology-driven workspace.

PROJECTS

DApp Certification (Blockchain-Based Solution) | *Ethereum, React.js, Solidity, Node.js, web3.js* | [GitHub Repo](#)

- Developed a blockchain-based solution for educational certificate verification.
- Key role in the development lifecycle from requirement gathering to implementation.

EAid Health (Android Application) | *Java, XML, Firebase, Android SDK* |

- Co-developed an Android app for disease diagnosis based on symptoms.
- Involved in database design and app development, utilizing Java, XML, and Firebase.
- Focused on creating a user-friendly interface and ensuring seamless integration of front-end elements with back-end functionalities.

EDUCATION

George Brown College, Toronto Expected 2024

PG Diploma in Applied AI Solutions Development

APJ Abdul Kalam Technological University, India 2022

Bachelor of Technology in Computer Science CGPA: 7.35/10 (9.5+ in Computer Labs)

Central Board of Secondary Education, India 2018

Senior Secondary Education Aggregate: 88.6 (97/100 in Computer Science)

COURSEWORK AND ACHIEVEMENTS

Courses: Data Science, Soft Computing, Machine Learning, Web Technologies

Relevant Achievements: High performance in Computer Labs, Strong academic record in Computer Science during Senior Secondary Education

SKILLS

Languages: Bash, C/C++, Python, Java, JavaScript, HTML/CSS, $\text{\LaTeX}$

Tools: Linux, Ethereum, React.js, Solidity, Node.js, web3.js, Java, XML, Firebase, SQL, Tableau, Azure, Travis CI, Git, Jenkins, Docker

Libraries/Frameworks: NumPy, SciPy, TensorFlow, Flask, Pandas

Soft Skills: Strong communication, problem-solving, and analytical skills. Experience in developing, testing, and debugging software applications. Ability to work effectively in team environments.

VOLUNTEERING

Kerala Flood Relief: Assisted in resource allocation and aid distribution, demonstrating strong organizational and team collaboration skills.

Webpage Development for Dialysis Patients: Developed a webpage for patient registration and payment gateway integration, showcasing technical proficiency and commitment to social causes.

CERTIFICATIONS

Architecting with Google Compute Engine 2021
